***Allowable Subject Matter***

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The last Office Action rejects claims 1-4 and 6 under 102(e) in view of Yona et al, and claims 5, 7-10, 12 and 14-16 under 103(a) in view of Yona et al or Yona et al in view of Eyoboglu et al. The basis of a header compressor is broadly interpreted as "manipulating or modifying header data in the event of packet loss during transmission". Applicant objects to this characterization and submits that the specification discloses "a method of compressing transmission protocol headers attached to video data to thereby reduce a band to be occupied, so real-time data can be transmitted over a low-speed serial line" (Amendment, p. 3), which is much restricted and different from the Examiner's interpretation. This argument is persuasive. With respect to the present invention as claimed, the prior art of record fails to anticipate or render obvious compressing header data contingent upon whether the moving picture signal is intra-frame coded or not.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
